Quaternary Sanitizer

Sani Tech

QUATERNARY BASED SANITIZER

Description:

Sani Tech is made from twin quaternaries, which provide strengthened tolerants to environmental conditions, broadened spectrum of biocidal activity and assured performance under the toughest conditions.

Because of its versatility it can be formulated into a dilution for sanitizing, disinfecting and deodorizing. When used as recommended, it is effective against Escherichia Coli, Staphylococcus Aureus, Salmonella, Choreraesus and Pseudomonas Aeruginosa.

Sani Tech is authorized under the food additive amendment of the Federal Food, Drug and Cosmetic Act for use as a sanitizer solution at 200-ppm active level without required a final potable water rinse.

Features

- Versatile formula can be used for sanitizing, disinfecting and deodorizing.
- U.S.D.A. Approved for use in all food handling or processing departments.
- Concentrated formula for economical use
- Broad spectrum of biocidal activity provides ideal cleaning and sanitizing for a wide variety of areas.

Usage Recommendations

Must be diluted to the proper ratio for sanitizing and disinfecting. Apply with cloth, mop or sponge for effective cleaning of walls and floors. For sanitizing previously cleaned food processing equipment, spray on at proper dilution and do not rinse.

Sani-Tech is also suitable for use as a three compartment sink sanitizer at a quaternary concentration of 200-400 ppm.
